

MysticsHR — Demo Documentation

Version: 1.0
Build date: April 22, 2026
Audience: HR leadership, IT champions, demo presenters

This guide walks through every module in MysticsHR, the integrated HRMS for Automystics Technologies. It includes screenshots of every important screen, the role required to reach it, and the demo path to follow during a live walk-through.

1. Demo accounts

All accounts use the password `DemoTest123!@#`.

Role	Sign-in email	What they see
Super Admin	arjun.sharma@automystics.com	Everything across every module
HR Manager	priya.v@automystics.com	Full HR + Onboarding + Leave + Performance + Documents
Payroll Admin	ravi.kumar@automystics.com	Payroll runs, payslips, salary structures, tax declarations
HR Executive	meena.r@automystics.com	Employees (read), Onboarding, Helpdesk, Documents
HOD	suresh.b@automystics.com	Team members, leave approvals, performance reviews
Employee (ESS)	kavitha.n@automystics.com	Self-service: attendance, leave, payslips, helpdesk

Sign in at `/sign-in`. The first sign-in links the Clerk identity to the seeded HRMS user.

2. Module overview

The system is organised into nine functional modules:

1. **Employees & Org Structure** — directory, departments, designations, org chart
 2. **Onboarding & Recruitment** — pre-onboarding, requisitions, candidates, joining checklist
 3. **Attendance & Shifts** — clock in/out, regularization, shift calendar
 4. **Leave Management** — apply, approve, calendar, policies, leave types
 5. **Payroll** — runs, payslips, salary structures, tax declarations, reports
 6. **Performance Management** — cycles, goals, appraisals, calibration
 7. **Helpdesk** — tickets with full SLA tracking
 8. **Documents** — templates, issued letters
 9. **Communications, Reporting & System Config** — notifications, analytics, audit, role configuration
-

Module 1 — Employees & Org Structure

Demo as: HR Manager (`priya.v@automystics.com`)

Dashboard

The first thing every authenticated user sees. Shows headcount KPIs, status breakdown, and a recent-activity feed.

Employee directory

`/employees` — searchable, filterable list of every employee with department, designation, and status.

Add a new employee

`/employees/new` — three-section form (Identity, Position, Employment).

Department→Designation cascades; manager picker pulls from active employees. Submitting auto-creates the onboarding checklist for the new hire.

Demo flow:

1. Open `/employees/new`
2. Fill Identity (name, employee ID, email, phone)
3. Pick Department → watch Designation list filter
4. Set Employment Type and CTC, then **Create Employee**
5. Land on the employee detail page; check `/onboarding` to see the auto-generated checklist for the new hire

Departments and designations

[Return to Dashboard](#)

Org chart

`/org-chart` — visualises reporting lines.

Module 2 — Onboarding & Recruitment

Demo as: HR Executive (`meena.r@automystics.com`)

Onboarding pipeline

`/onboarding` — every new hire's status with completion percentage. Lakshmi Iyer (latest joiner) has an active checklist seeded with 7 mixed-status tasks.

Pre-onboarding

/pre-onboarding — for offers issued but joining still pending.

Recruitment

`/recruitment` — requisitions and candidate pipeline.

Demo flow:

1. Open `/onboarding` , click Lakshmi's record
2. Walk through the 7 tasks (documentation, ID card, equipment, etc.)
3. Mark a pending task complete → progress percentage updates live

Module 3 — Attendance & Shifts

Demo as: Employee (`kavitha.n@automystics.com`) for ESS, HR Manager for admin views

My Attendance (ESS)

`/my-attendance` — clock in/out widget, today's status, last 30 days history. Every seeded employee has 30 days of attendance.

Attendance summary (HR view)

/attendance/summary — aggregate present/absent/half-day across the org.

Regularization

`/attendance/regularization` — employees flag missed punches; HR approves/rejects.

Shifts & calendar

`/shifts` lists templates (Morning, General, Night, Flexible). `/shifts/calendar` shows the rotation.

Demo flow:

1. Sign in as Kavitha → `/my-attendance` → click Clock-In
 2. Switch to Priya → `/attendance/regularization` → approve the seeded request
 3. Show `/attendance/summary` for org-wide view
-

Module 4 — Leave Management

Demo as: Employee for application, HR Manager for approval

Employee leave home

`/leave` — balance per leave type, recent applications, apply form.

Approval queue

`/leave/approvals` — pending applications routed to the right approver. 5 mixed-status applications are seeded.

Leave calendar

`/leave/calendar` — see who is out at a glance.

Configuration

`/leave/types` (6 seeded leave types) and `/leave/policies` (1:1 policies per type with carry-forward rules).

Demo flow:

1. Sign in as Kavitha → `/leave` → apply for 2 days of Casual Leave
2. Sign in as Priya → `/leave/approvals` → approve
3. Back on Kavitha's `/leave` → balance reduces, calendar updates

Module 5 — Payroll

Demo as: Payroll Admin (`ravi.kumar@automystics.com`)

Payroll runs

`/payroll` — 2 finalised runs (Locked) plus 1 draft for the current month, all with payslip generation.

Salary structures

`/payroll/salary-structures` — 7 components per employee (Basic, HRA, Special Allowance, PF, ESI, Professional Tax, TDS).

Payslips

/payroll/payslips — every issued payslip, downloadable.

Reports

`/payroll/reports` — register, Form 16, statutory summaries.

Tax declarations

`/payroll/tax-declaration` — employees submit 80C / HRA / interest declarations.

Demo flow:

1. `/payroll` → open the draft run for the current month
2. Click **Calculate** → review preview, then **Lock**
3. Open the latest locked run → drill into a payslip → download PDF

Module 6 — Performance Management

Demo as: HR Manager (or HOD for evaluator view)

Active cycle

`/performance` — the seeded annual cycle is in **Mid Review** stage with self-appraisals and manager evaluations underway.

Goals

/performance/goals — 3 goals per employee with progress percentages.

Appraisals

`/performance/appraisals` — track self-appraisal and manager-evaluation status across the org.

Calibration

`/performance/calibration` — bell-curve / rating distribution before final lock.

Demo flow:

1. `/performance` → open the active cycle
2. Walk into a goal → update progress
3. Switch to HOD (Suresh) → `/performance/evaluations` → submit a manager rating

Module 7 — Helpdesk

Demo as: Employee (raise) → HR Executive (resolve)

Ticket list

`/helpdesk` — 5 seeded tickets across **Open / In Progress / Resolved / Closed**.

SLA report

/helpdesk/sla-report — within-SLA vs. breached over the trailing period.

Demo flow:

1. Sign in as Kavitha → `/helpdesk` → **Raise Ticket** (e.g., “Need updated payslip for March”)
2. Sign in as Meena → `/helpdesk` → open the ticket → comment & change status to **In Progress**
3. Resolve → ticket count moves on the SLA report

Module 8 — Documents

Demo as: HR Manager

`/documents` lists templates (Offer, Experience, Appointment) and every issued document.

Demo flow:

1. From an employee detail page, click **Issue Document** → pick “Experience Letter”
2. Preview merged content (employee fields auto-populated)
3. Generate → appears in `/documents` with a download link

Module 9 — Communications, Reporting & System Config

Demo as: Super Admin (`arjun.sharma@automystics.com`)

Communications

`/communications` — bulk announcement composer, in-app notifications, email logs.

Analytics

`/analytics` — headcount trends, attrition, leave utilisation.

Reports library

/reports — exportable reports across modules.

Audit log

`/audit-logs` — every privileged change with actor, timestamp, before/after.

Users & roles

`/users` — manage HRMS users; `/permissions` shows the role-permission matrix.

Settings

`/settings` — organisation profile, work locations, fiscal year, integrations.

Bonus — Employee Self-Service hub

`/ess` is the consolidated landing page for employees: attendance, leave balance, payslips, tickets, profile.

Suggested 15-minute demo script

Min	Action	Role
0:00	Sign in, tour Dashboard & Employee Directory	HR Manager
2:00	Create a new employee → land on detail → show auto-onboarding	HR Manager
4:00	Switch role → mark an onboarding task complete	HR Executive
5:30	ESS clock-in, apply for leave	Employee
7:00	Approve the leave, show calendar update	HR Manager
8:30	Open draft payroll run, lock it, drill into payslip	Payroll Admin
11:00	Walk through performance cycle → goal update → manager eval	HR Manager + HOD
13:00	Raise a helpdesk ticket → resolve → SLA report	Employee + HR
14:30	Audit log + user/role matrix	Super Admin

Resetting the demo data

If demo data drifts (deleted records, partially completed flows), reseed with:

```
# Repopulate every operational table
node_modules/.pnpm/tsx@4.21.0/node_modules/tsx/dist/cli.mjs artifacts/api-server/src/

# Re-link Clerk users to HRMS roles (idempotent)
node_modules/.pnpm/tsx@4.21.0/node_modules/tsx/dist/cli.mjs artifacts/api-server/src/

# Re-capture screenshots for the docs (after UI changes)
node_modules/.pnpm/tsx@4.21.0/node_modules/tsx/dist/cli.mjs artifacts/api-server/src/
```
