## 2. Module overview

---

The system is organised into nine functional modules:

1. **Employees & Org Structure** — directory, departments, designations, org chart
  2. **Onboarding & Recruitment** — pre-onboarding, requisitions, candidates, joining checklist
  3. **Attendance & Shifts** — clock in/out, regularization, shift calendar
  4. **Leave Management** — apply, approve, calendar, policies, leave types
  5. **Payroll** — runs, payslips, salary structures, tax declarations, reports
  6. **Performance Management** — cycles, goals, appraisals, calibration
  7. **Helpdesk** — tickets with full SLA tracking
  8. **Documents** — templates, issued letters
  9. **Communications, Reporting & System Config** — notifications, analytics, audit, role configuration
- 

## Module 1 — Employees & Org Structure

---

**Demo as:** HR Manager ( `priya.v@automystics.com` )

### Dashboard

The first thing every authenticated user sees. Shows headcount KPIs, status breakdown, and a recent-activity feed.

## Employee directory

`/employees` — searchable, filterable list of every employee with department, designation, and status.

## Add a new employee

`/employees/new` — three-section form (Identity, Position, Employment).

Department→Designation cascades; manager picker pulls from active employees. Submitting auto-creates the onboarding checklist for the new hire.
